SUMMARY

Product Engineer with full-stack experience across React Native, Node.js, Python, and cloud-based product delivery in health-tech startups. Built and scaled product systems to 70k+ monthly active users and owned end-to-end engineering for mobile, web, and automation workflows, from first idea to shipped product.

EXPERIENCE

Founder & Product Engineer

GigAway

Aug 2026 - Present Berlin, Germany

https://github.com/talbizzz/gigaway

Built and shipped a verified-artist hospitality app and admin web app as a solo founder-engineer, using Expo/React Native, Supabase, and Deno Edge Functions.

- Built the mobile app in Expo/React Native and implemented the backend on Supabase and Deno Edge Functions, delivering end-to-end across client and server layers.
- Set up dev and prod environments with approval-gated CI/CD, and implemented human-reviewed ID verification, double-blind reviews, and GDPR export and deletion.

Software Engineer (Full Stack / Mobile)

Physiofit Digital GmbH

Feb 2024 - Jul 2026 Munich, Germany

https://physiofit.app/

Core engineer in a 2-person team, co-building and scaling a health-tech product ecosystem from 0 to 70k+ MAU (9k+ DAU) across 600+ practices.

React, React Native, Cloudflare, Node.js, Chatwoot, PostHog, Intercom, Sentry, Firebase, GCP, Python, Vite, AI integrations.

- Built and launched a voice-based AI phone agent that handled real-time patient inquiries across the practice workflow, demonstrating applied backend automation and product integration.
- Built an automated Python video-generation pipeline with MoviePy and CSV metadata that replaced hours of manual editing with a self-service asset creation workflow.
- Led the migration from Intercom to Chatwoot, improving control over support workflows and reducing platform overhead.
- Architected webhook automations across HubSpot, Chatwoot, WhatsApp, and Slack to streamline lead confirmations, reminders, team assignment, and real-time status updates.
- Delivered the full stack for 2 therapist PWAs, a multi-practice owner dashboard, an embeddable patient check-in widget, and a redesigned patient mobile app.
- Implemented lazy loading with paginated views (20/50/100 entries) for pages holding thousands of records, cutting load times from heavy lag to under one second.
- Resolved high-pressure production issues across native iOS and Android builds and cloud infrastructure, typically within an hour, using Sentry and GCP Cloud Functions.

Software Engineer (Full Stack / Mobile)

Getfit

Jul 2023 - Feb 2024 Munich, Germany

Contributed to a core React Native mobile application as part of a 6-person startup team.

- Collaborated directly with the CTO in rapid, iterative product cycles to ship user-facing features that laid the structural foundation for the subsequent pivot into Physiofit.

Front End Software Engineer - Working Student

NTT DATA

Jan 2022 - Jul 2023 Munich, Remote

- Developed internal management cockpit tools using Angular within a structured corporate enterprise environment, coordinating across multiple stakeholder groups.
- Contributed to the UI/UX redesign of a critical internal incident-management system using React.

SKILLS

Frontend
React, React Native, Expo, Vite, TypeScript, Angular, JavaScript

Backend
Node.js, Python, Firestore, Supabase, Deno Edge Functions

Cloud / Tools
GCP, Cloudflare, Firebase, CI/CD, GitHub Actions, Sentry, PostHog

Integrations
Chatwoot, Intercom, HubSpot, AI integrations

EDUCATION

B.Sc. Information Systems (Wirtschaftsinformatik)

Technical University of Munich

Sep 2020 - Dec 2024 Munich, Germany

LANGUAGES

English	Bilingual
German	Business Fluent
French	Native
Arabic	Native

PROJECTS

Frontend Team Lead | TUM × Mercedes × Salesforce

Sep 2022 - Dec 2022 Munich, Germany

Stack: React, TypeScript

Led a fast-moving team of 5 developers building an immersive car-ordering MVP prototype.

- Owned the frontend architecture, managed agile sprint planning, conducted code reviews, and delivered the final presentation to major corporate stakeholders.

iOS Developer Intern (Swift) | Technical University of Munich (TUM)

Mar 2023 - Jul 2023 Munich, Germany

Stack: Swift, ARKit

Owned the end-to-end development of a 3D Room Builder module inside an AR-based indoor navigation and localization application.

- Integrated 2D/3D spatial modeling features and delivered an MVP presented to key industry partners.

KEY ACHIEVEMENTS

Scaled Health-Tech Platform to 70k+ MAU
Scaled a health-tech platform from 0 to 70k+ MAU (9k+ DAU) across 600+ practices in a 2-person engineering team.

Built Production-Grade Founder Product Solo
Built and shipped a verified-artist hospitality app and admin web app solo in about 8 weeks.
